Key Insights

Key Insights & Recommendations

Key findings from EV adoption analysis and recommended business actions

Last Refreshed

23-08-2026

01 RANGE ANXIETY

Insight

Buyers with lower range anxiety show higher EV purchase intention than buyers with higher range anxiety.

Action

Communicate real-world driving range and charging availability clearly to reduce range-related concerns.

02 HOME CHARGING

Insight

Home charging is associated with higher purchase intent.

Action

Improve access to convenient home-charging solutions and installation support.

03 SUBSIDY

Insight

EV purchase intention is higher among buyers with subsidy availability.

Action

Promote available incentives and explore partnerships that make EV ownership more affordable.

04 ENVIRONMENTAL CONCERN

Insight

Buyers with higher environmental concern show stronger EV purchase intention.

Action

Highlight the environmental benefits and potential emissions reductions associated with EVs.

05 HIGH-POTENTIAL BUYERS

Insight

64.46% of buyers are classified as High Potential based on the EV Potential Score.

Action

Prioritize this segment with targeted offers, financing options, charging solutions and range-focused messaging.

06 AGE GROUP

Insight

Buyers aged 41–50 and 51–60 show stronger EV purchase intention than some younger groups.

Action

Develop targeted campaigns for high-intention age groups while continuing EV awareness among younger buyers.

TOP BUSINESS PRIORITY

Focus on the High-Potential Buyer Segment

6,446 buyers (64.46%) are classified as High Potential. Targeting this segment with relevant incentives, charging solutions and clear range messaging could help increase EV purchase intention.
